DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 9-11 of the Remarks section for the Amendment, filed on December 27, 2004, with respect to newly amended independent claims 1 and 5 have been fully considered and are persuasive. The rejection of independent claims 1 and 5 has been withdrawn.

Allowable Subject Matter

2. Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance:

As for independent claims 1 and 5, the prior art, alone or in combination, does not teach or fairly suggest a method and apparatus for recording program information comprising the claim limitation of, "a displaying device for displaying, to the user, the newly obtained program information and a change mark indicating the newest program information which was not included in the programming information selected by the user."

As for the most pertinent prior art of record, the Hennig (USPN 5,956,455) reference discloses a method and apparatus for recording program information, including determining if changes have been made in screen displays, as well as all of the limitations of independent claims 1 and 5 except for, "...displaying, to the user, the newly obtained program information and a change mark indicating the newest program information which was not included in the programming information selected by the user."

Art Unit: 2614

In the Applicant's invention the features as described above are specifically disclosed in the limitations of claims 1 and 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Grooters et al (USPN 6,832,387) – Discloses systems, methods, and software for using markers on channel signals to operate electronic program guides and recording devices.
